

# GUIDE:

## How to sort out your food waste

1

### Sort out your food waste

Food waste is anything left over that can't be saved after preparing or eating food:

- Meat, sausage, fish, chicken and shellfish
- Peels and fruit- and vegetable waste
- Coffee, coffee-filters, tea and teabags
- Pasta, noodles, rice and bread
- Egg and eggshells
- Uncolored kitchen paper
- Fika, snacks and sweets

2

### Throw your food waste in the bag

Only use the food waste bags made of paper that is provided by Munkfors municipality.

Always place the bag in the holder for better ventilation. Fold down the edges of the bag so that it stands more steadily.

If the bag is placed in a bucket or on the floor it will get wet and tear.

3

### Throw bag in the brown container

Dispose the food waste bag in the brown food waste container. Even if the bag isn't full, it's a good idea to dispose of it every three days.

We use vehicles with separate sections for food waste and residual waste. Different types of waste should never be mixed together!

# What do I throw in the bag?

**Yes please!**

*Pssst...du you know that you can throw your kitchen paper in the food waste bag?*

Peel, fruit- and vegetable waste

Pasta, noodles, rice and bread

Fika, snacks and sweets

Coffee, coffee-filters, tea and teabags

Egg and eggshells

Meat, sausage, fish, chicken and shellfish.

**No thanks!**

Plastic, cat litter, flowers, diapers, soil, ash, candle, tobacco, cotton pads and cotton swabs, plants, dust bag and chewing-gum is not food waste and should be disposed in the green waste container.

## About the food waste bag

The paper food waste bag is made to contain food waste and to decompose during the biogas-production. Therefore it's important to **only use the food waste bags** provided by Munkfors municipality.

Never put plastic together with food waste – not even so-called “degradable plastic bags”. Don't place food waste in plastic bags, as plastic makes it hard to recycle the waste.
